A REPORT ON FIELD VISIT TO ASTER AADHAR HOSPITAL

Department of Food Technology have organized a field visit to the Aster-Aadhar Hospital on 19th April 2022 at 11 am. The visit was organized for the students of PGDND and M.Sc. Food Science and Nutrition.

The various objectives behind organizing such visits are-

1. To get students familiar with the work environment of Food Service Establishments (Hospital Kitchen).
2. To gain practical knowledge about kitchen spaces, equipment, work hierarchy etc.
3. To observe work of a dietitian in a hospital set up.
4. To get familiar with the hospital based kitchen set up.

Aster Adhar is a multispeciality NABH accredited hospital situated at Shastri Nagar area of Kolhapur city. This hospital can accommodate 400 patients in general ward, private wards and in ICUs. Aster Addhar has got 25 plus specialities in medical and surgical intervention.

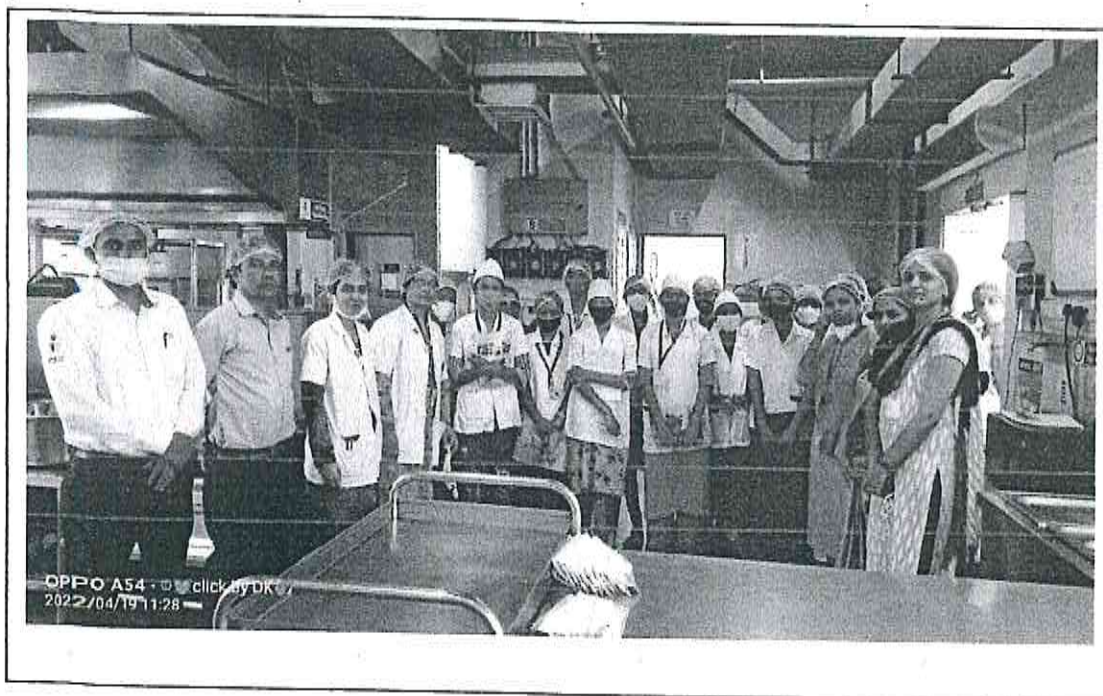

The Food Service Department is located on the second floor. The main kitchen and dining area is adjoining. Therapeutic diets are provided to the in patients as per the dietitians order. i.e. diabetic diet, renal diet, salt restricted diet, soft diet, semi-solid diet, liquid diet and so on. Regular/ Normal diets can also be provided to the relatives on demand. There are different sections located in the kitchen, like- pre preparation area, work area, packing area, cleaning area, storage space. Each area is provided with SOPs to be followed strictly. Disposable dishes are used to serve the food. Food plates are kept in hot cabinates and are delivered on respective floors. There is a set time table of the patient's diet made by a dietitian. Storage space is located at the basement i.e. dry storage and low temperature storage. Cleaning is done on daily basis. Everyone in the kitchen works under the Food Service Manager.

A Report on- Wall Paper Display.

Wall paper display was organized by the PGDND students on 18th December 2021. The topic for the same was- **ANEMIA**. Students were grouped into three different groups, 10 students in each group. Following were the subtopics-

1. Iron Deficiency Anemia
2. Vitamin 12 Deficiency Anemia
3. Folate deficiency Anemia

The objective behind this was to create awareness about Anemia. Anemia is the major public health problem amongst Indian community. Children of 0 to 5 age group, adolescent girls, pregnant and lactating women are the at risk age group for the same. According to the current statistic, more than 50% of Indian women are suffering from Anemia. This results in reducing the productivity of the people and ultimately productivity of the nation itself. Anemia can be better prevented with the help of proper diet and by inclusion of iron, folate and B12 sources in the diet. Thus there is a need to create an awareness about the same.

Total 20 students were present for the same (annexure 1).

Posters were displayed at the college entrance. (annexure 2).

Mrs. Anuja Khurandal, Centre Co-ordinator at Childline Kolhapur Sangli Mission Society was inaugurated the event. Principal Dr. A. R. Kulkarni, HOD Fashion Department Mrs. Jyoti Hiremath and HOD Food Technology Mrs. Shweta Patil were present for the same.

INTERPRETATION OF CASE-

Lactose intolerance is a common digestive problem where the body is unable to digest lactose. Lactose is a type of sugar mainly found in milk & dairy products.

Milk sugar lactose requires β -glucosidase lactase enzyme for its digestion. Lactase also helps in enhancing the rate of calcium absorption in children.

People with lactose intolerance don't produce enough lactase because the activity of that enzyme is decreased or reduced. So lactose stays in the digestive system where it is fermented by bacteria. This leads to the production of various gases, which cause the symptoms like bloating, cramping, flatulence & diarrhoea after taking milk & milk products.

About 50% of adults from Asia & Africa suffers from lactose insufficiency.

Treatment includes tablets of Lactase with high lactose food.

Fermented milk products like curd, buttermilk can be given as lactose is already gets converted into lactase in these foods.

The girl is having complaints of periodic diarrhoea since past few years. Her weight is about 25 kg. Her physician prescribed her tablets of lactase enzyme - Tablet Maxilact.

JUSTIFICATION .

In lactose intolerance people are not able to digest the lactose present in milk & milk products. So, there can be deficiency of calcium & other minerals. SMP, chicken, or pulses provides proteins to the body. SMP also provides calcium to the body. Fruit juice of orange & sweetlime provides vitamin C. Banana gives potassium as well as energy. Nuts & groundnut are energy dense foods. Therefore, the laddu gives energy, fat as well iron as it contains ragi flour.

DIETARY GUIDELINES AND PATIENT COUNSELLING TIPS-

- 1) Instead of milk, can include fermented milk products in diet like curd, buttermilk, etc.
- 2) Replace milk with soya milk or almond milk.
- 3) Take calcium rich foods.
- 4) Include different fruits in your diet.
- 5) Include dairy foods with meals rather than in between meals.
- 6) Include energy dense foods.
